Clinical Experience

My area of clinical surgery is mainly directed towards the care of people who have peripheral vascular disease. This includes patients with lower and upper extremity PAD, Abdominal Aortic Aneurysms and Carotid Atherosclerosis. My experience is mostly in open surgical procedures and to a much lesser extent in endovascular procedures.

I also provide care for patients with Chronic Venous Insufficiency and patients with Deep Vein Thrombosis.

I perform vascular access procedures for patients with end-stage renal disease who are or will be on regular haemodialysis.

I am experienced in the management of people who are affected with vascular trauma.
