

Published Research:

1-Apelin : A potential link between inflammation and cardiovascular disease in end stage disease patients Scandinavian Journal of Clinical & Laboratory Investigation, 2010; 70: 421–427

2-Relationship of increased circulating adrenomedullin with cardiac dysfunction, inflammation, oxidative stress and volume overload in hemodialysis patients

Scandinavian Journal of Clinical & Laboratory Investigation, 2011; 71: 208–215

3- Correlations of Urinary Biomarkers, TNF-Like Weak Inducer of Apoptosis (TWEAK), Osteoprotegerin (OPG), Monocyte Chemoattractant Protein-1 (MCP-1), and IL-8 with Lupus Nephritis

Journal of Clinical Immunology

DOI 10.1007/s10875-011-9555-1 21 June 2011

4- Relationship of BsmI polymorphism of vitamin D receptor gene with left ventricular hypertrophy and atherosclerosis in hemodialysis patients

Scandinavian Journal of Clinical & Laboratory Investigation, 2012

5- CRP and acute renal rejection: a marker to the point International Urology and Nephrology

03 January 2012

6- The association of adiponectin serum level and ADIPOQ +45

T/G and ADIPOR1 –106 A/G gene polymorphisms

with diabetic nephropathy in type 2 DM

Comparative Clinical Pathology

16 August 2

7- Distance from treatment facility and risk of death from cardiovascular and infectious causes in renal transplant patients.

Indian Journal of Nephrology- March 2013 / Vol 23 / Issue 2

8-cell-attracting chemokine (CXCL13) as a marker of disease activity and renal involvement in systemic lupus erythematosus

AFRICAN JOURNAL OF NEPHROLOGY

9-Serum Osteoprotegerin level and the extent of cardiovascular Calcification in haemodialysis patients

AFRICAN JOURNAL OF NEPHROLOGY

10-Evaluation of serum hepcidin in assessment of iron status in renal transplant patients

AFRICAN JOURNAL OF NEPHROLOGY
