

Title: Viruses of Fish (CRN: VIR-3182). Syllabus and important dates.**Date: Thursday, March 30, 2023.****Author and course coordinator: Ausama A. Yousif, DVM, MSc, PhD. Professor of virology.**

Week	Subject	Special Notes
1	-Overview course policy and welcome notes. -The impact of fish and crustacean viral infections on aquaculture*.	Please check my University Scholar Website.
2	The tools and approaches available for discovery of fish and crustacean viruses in Egypt*.	Think about topics <u>related to virus control in aquaculture settings</u> .
3	The tools and approaches available for discovery of fish and crustacean viruses in Egypt*.	Think about topics <u>related to virus control in aquaculture settings</u> .
4	Infectious Pancreatic Necrosis and related viruses of <i>Birnaviridae</i> .	Try sending you report title to me. If you do have an experimental design in mind send it as well. If not, send me questions regarding the difficulties you are having.
5	Red Sea Bream Iridovirus of <i>Iridoviridae</i> .	Try sending you report outline to me.
6	Nervous Necrosis Virus of <i>Nodaviridae</i> .	It is time to send your report content .
7	Tilapinevirus tilapiae virus of <i>Amnoonviridae</i> .	Discuss your edited report contents.
8	Ceprinid herpesvirus 2 of <i>Alloherpesviridae</i> .	Experimental design first draft must be sent.
9	Viral Hemorrhagic Septicemia Virus of <i>Rhabdoviridae</i> .	Experimental design draft must be discussed.
10	Strategies and tools for the control of fish and crustacean viruses.	Short Report due. Final week for handing in experimental designs.
11	Review	Assignment must be handed in by the end of this week.
	PROJECTED Exam week.@	Good luck.

* This topic will be discussed throughout the course and an overview will be presented during the specified lecture.

@ The exam schedule will be sent when the administration has set it.

Notice: I will be expecting you to contact each other and myself at least twice a week. When a web meeting is required, I will try to schedule an online meeting using suitable technology. You will have to work online together.

At the end of each week, I expect you to assemble a set of 10 questions that can be part of your exams. This is going to be in the form of group activity. The exercise will keep you on track. It will also help you understand the required concepts.

I will support you at all time. Learn, understand, and help humanity.

Best of luck.

Ausama

End.
