

Hanafy Mahmoud received the Bachelor and M.Sc. degrees in electrical engineering from Cairo University, Cairo, Egypt, in 2009 and 2012, respectively. He is currently working toward the Ph.D. degree at the University of Padova, Padova, Italy. During the M.Sc period, he worked on faults detection and performance analysis of the induction machines. His research activities are concentrated on the analysis of permanent magnet synchronous machines, focusing on analytical and finite-element modeling, and faulty conditions analysis, as well as, design of synchronous reluctance (SR) and PMSR machines.
