

## *To whom it may concern*

Here we confirm that **Dr. Mahmoud Hamdy Abdel Sayed Nasr**, the assistant lecturer in the Critical Care Medicine Department Cairo University Hospitals, has spent:

- Three years residency in the Critical Care Medicine Department during the period from 15/05/2014 to 14/05/2017.
- Assistant lecturer in the Critical Care Medicine Department (from 2017 till now).

During these periods he had basic medical training regarding the physiology, pathology, diagnosis, differential diagnosis, investigations, management and the prophylaxis of different cardiac, pulmonary, neurological, endocrinal, gynecological, oncological, hepatic and renal problems.

His training program in the department includes:

- Daily ward rounds in the Critical Care Department.
- Attending staff rounds with senior professors and other staff members.
- Attending the department conferences.
- Participation in journal clubs and case presentations.
- On call duties.
- Management of mechanical ventilators and temporary pacemakers.
- Advanced airway management skills.
- Ultrasound guided maneuvers e.g. Central Venous Line insertion, pericardiocentesis, pleurocentesis, ascetic fluid aspiration...etc.
- One day per week in the echocardiography lab.

Mahmoud Nasr proved through the period he spent in the department that he is an active doctor who has obtained the appreciation and love of his colleagues and staff with a cooperative, teaching, friendly way in dealing with his colleagues. He accepts the other opinion in a positive way with a trial to correct and get benefit of his mistakes. He is very decent in dealing with patients and their relatives, trying to explain the case in a simple way to understand.

He has also a good communication skills with other doctors in the hospital, good administrative skills, how to deal with the nursing staff and other working groups in a positive teaching attitude, how to deal with the problem he faces and the ability to cope with pressure.

**Dr. Sherif Hamed**

**Professor and Chief of Critical Care  
Medicine Department  
Cairo University**
